

Results of a Principal-Components/Factor Analysis for Me of BPRS Measures Taken from August 30, 2011 to April 16, 2012, Being 677 Measures in All, Reducing into 19 Components, Showing My Scoring on Resultant Scales

Published by: Vernon Lynn Stephens, April 16, 2012

Number & Name of Component	Loadings on the Component	Mean of Loadings on the Component Per Scale	Standard Deviation of Loadings on the Component Per Scale	My Score on Loadings on Component Per Scale	“Z” Score of My Mean for Loadings on Component Per Scale
1. Schizophrenia-Undifferentiated	Hallucinations = .377; Blunted Affect = .309	2 .997	.1224	1.9985	- 8 .157
2. Paranoia	Hostility = .318; Suspiciousness = .335; Tension = - .321; Uncooperativeness= .301	5.0404	1.6023	1.8709	- 1.978
3. Glum	Guilt = .301; Elevated Mood = -.465; Grandiosity = . . . 330; Motor Retardation = .326; Excitement = - .419	5.1859	1.1859	- .6701	- 4.938
4. Dour	Guilt = - .363; Elevated Mood = - .422; Excitement = - .388	3.6311	1.0761	- 3.631	- 6.7485
5. Going Downhill	Somatic Concern = .443; Self-Neglect = .601; Mannerisms & Posturing = .512	3.0659	1.0761	3.0657	- .0001
6. Upward	Suicidality = - .379; Grandiosity = .327; Emotional Withdrawal = - .587; Tension = - .336	4.7511	.6808	-2.6326	- 10.845
7. Alert-Melancholy	Depression = .313; Suicidality = .350; Motor Retardation = . - .306; Distractability = -.651	5.8860	1.0378	- 1.1245	- 6.755
8. Anxious Withdrawal	Anxiety = .314; Unusual Thought Content = - .326; Conceptual Disorganization = .410; Emotional Withdrawal = .305; Tension = .354	5.9910	1.3819	3.9113	-4.3350

Number & Name of Component	Loadings on the Component	Mean of Loadings on the Component Per Scale	Standard Deviation of Loadings on the Component Per Scale	My Score on Loadings on Component Per Scale	“Z” Score of My Mean for Loadings on Component Per Scale
9. ‘Toothache’ (because Somatic Concern is for chipped tooth, thus Distractability.)	Somatic Concern = .412; Conceptual Disorganization = -.490; Distractability = .377	3.9940	.4314	1.1065	-6.6939
10. ‘Toothache’ Humbled	Somatic Concern = .495; Grandiosity = -.314; Conceptual Disorganization = .445; Emotional Withdrawal = -.332	4.2308	.5727	-.1441	-3.0360
11. Motor Retardation	Motor Retardation = .618	1.5547	.5003	1.5547	“ 0 “ (Actually, a division-into-zero.)
12.	Anxiety = .353; Suicidality = -.327; Conceptual Disorganization = -.419; Mannerisms & Posturing = -.347	3.3268	.6627	-1.7043	-7.5918
13. Compliant-Hostile	Hostility = .444; Suspiciousness = .307; Emotional Withdrawal = -.311; Uncooperativeness = -.444	4.5037	1.1616	.2699	-3.6448
14. Guilty-But-Calm	Guilt = .461; Hostility = -.461; Tension = .302	2.0254	1.4594	1.7256	-.2250
15. Tardive-D-Neat	Self-Neglect = -.569; Mannerisms & Posturing = .640	2.0254	.2278	-.0045	-8.9108
16. Elated-Suspicious	Elevated Mood = .404; Suspiciousness = .327; Unusual Thought Content = .345; Uncooperativeness = -.305; Motor Hyperactivity = -	5.3613	.9266	1.2175	-4.4720

	.321				
Number & Name of Component	Loadings on the Component	Mean of Loadings on the Component Per Scale	Standard Deviation of Loadings on the Component Per Scale	My Score on Loadings on Component Per Scale	“Z” Score of My Mean for Loadings on Component Per Scale
17. Sulking-Guilt	Depression = -.558; Guilt = .490; Hostility = .368; Motor Hyperactivity = -.313	4.902	1.3812	.171	-3.4252
18. Tensely Deluded	Anxiety = -.401; Grandiosity = -.418; Unusual Thought Content = .394; Tension = .354	6.0824	1.4767	.1644	- 4.0041
19. Suspicious-Flat	Suspiciousness = .593; Blunted Affect = .412	2.1319	.4390	2.1319	“ 0 ” (Actually, division into zero, as in Component # 11)

The sum of variance for the nineteen components equals 95.42 % of the total variance. The results seem to indicate that I score “low” on all factors/components using a normative scaling.
